# DocTainium Cloud Document Management Service

DocTainium is an easy to use and affordable document management system designed to meet the basic needs of small-medium sized businesses or departments within larger organizations. With no user licenses to purchase, you can scale the solution across the organization quickly and in a cost-effective manner.

Key Features of Doctainium Cloud

- **<u>NO USER LICENSES</u>** so you can give everyone in your department or organization secure access to your records based on user permissions
- Works with any Capture software that can export to SQL or Access DB using upload tool *
- Security utilizes Users and Groups to limit access to files based on login
- Search using meta data or Full Text OCR
- Store any file format including MS Office, CAD, Video, PDF, or Audio files
- Viewer supports PDF and image formats
- Public Portal module available for external access to individuals outside of the organization*
- API available for integration with third party applications or line of business applications
